Other Important Items			
Electrical System Requirements			
The unit has no exposed or bare live wires.			
Use of extension cords and electrical adapters are not overloading the circuit.			
If the building was constructed in 1960 or earlier, the fuses in the panel box that serves each unit is rated at least 15 amps.			
<i>Note: If the fuses are greater than 15 amps and the unit was built in 1960 or before, an electrical danger is present unless the wiring has been updated. The City strongly recommends that you contact an electrician if you are not sure about the proper fuses for the building or units.</i>			
Sub-panels are labeled and breakers are in proper working condition.			
Plumbing and Mechanical Requirements			
Electrical or gas heaters are functioning properly.			
The water heater is in working order supplying water at a minimum of 120° F.			
The water heater has a working temperature and pressure relief valve including a proper drain line on the pressure relief valve.			
Gas lines have shut-off valves at the appliance connection.			
All service gas lines are free of leaks.			
The vent pipes that serve gas heating appliances are terminated above the roofline with vent caps. (Direct vent heaters are exempt.)			

Single-family Unit Inspection
 SELF-INSPECTION CHECKLIST

Mold			
There is no visible mold in the unit.			
Information: If mold is found, assess the situation the cleaning and/or using a professional mold abatement company to refinish all deteriorated surfaces and remedy the water intrusion problem. If mold is resident-caused, after addressing the problem, the City of West Orange recommends that you give your tenants a "Mold Notification Addendum" to add to your rental agreement. This addendum should inform residents about mold and their responsibilities to prevent mold growth and how to inform owner of possible water intrusion/mold in the unit.			
Vector (insects, rodents and/or other pests)			
Property is free of infestations.
